

# NEW SCOTT TRANSISTOR TUNER BRINGS MAJOR IMPROVEMENT TO FM LISTENING

... AND YOU CAN OWN ONE FOR ONLY \$259.95

Great news! Scott announces a top-performing solid-state FM stereo tuner at a modest price . . . a no-compromise tuner that exceeds the performance of conventional tube units, and is factory guaranteed for two full years. ■ The superb per-

formance of the new Scott 312 required an entirely new approach to tuner circuit design . . . not just a simple substitution of transistors for tubes . . . it meant not just one, but six major engineering innovations. A few of these are shown below:

Exclusive "Comparatron" provides foolproof silent automatic stereo switching. Momentary changes in signal strength will not cause stereo to switch in and out as do ordinary automatic devices.

"Flat Line Limiting" circuits assure quiet noise-free FM reception, impervious to pulses caused by automobile ignitions, refrigerators, apartment house elevators, and other electrical noises.

New Scott silver-plated four-nuovistor front end outperforms even the best conventional vacuum tube front ends. Nuovistors provide greater reliability, longer life, and guaranteed stability over years of use.

**SPECIFICATIONS:** IHFM usable sensitivity (minimum) 2.2  $\mu$ v; signal-to-noise ratio: 65 db; distortion: under 0.8%; drift: less than 0.02"; frequency response (in stereo):  $\pm$  1 db, 30-15,000 cycles\*; capture ratio: 4 db; selectivity: 30 db; cross modulation rejection: 80 db; AM suppression: 55 db; accuracy of calibration: 0.5%; separation: 35 db, an outstanding design accomplishment. Dimensions 15½" w x 5½" h x 13¼" d in optional accessory case.

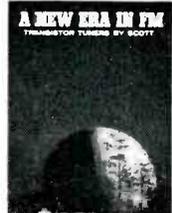

\*These are the limits prescribed by the FCC. All Scott tuners will exceed these frequencies.

## IMPORTANT FREE OFFER FROM SCOTT

• H. H. SCOTT, INC.  
• 111 Powdermill Rd.  
• Department  
• Maynard, Mass.

Please rush me your free booklet, "A New Era in FM" explaining how you can get better FM reception with these new solid state circuits, and complete specifications on the Scott 312 solid state FM Stereo tuner.
